Cool Congregations
\$10,000 in Prizes!

Help us spread
the word with
these tools:

Dear CIP&L Member,

Would you like to help your congregation measure its carbon footprint? Interfaith Power and Light is pleased to share with you our brand new carbon footprint calculator designed specifically for congregations and congregants.

It allows you to input basic information about energy use, and then provides a total "footprint" in pounds of carbon and acres of land. This tool will help your congregation find out where its emissions are coming from and identify steps you can take to significantly reduce energy use. Then, you will be on the path toward saving money and saving Creation at the same time.

To further entice you to participate, we are offering \$10,000 in cash prizes to congregations that make the most progress in shrinking their footprints. But to enter the contest, you must measure your footprint before the end of the year.

Visit www.ijcbg.com today to measure your footprint.
Keep the faith,

The Rev. Cn. Sally Bingham

P.S. Please use the links to the left to pass the message on to friends and family!
