

Prayer For the Earth

Originator of the universe, fashioner of atoms
that exist in every molecule,
awesome is your work.
May the interconnectedness
you've designed and display
throughout the cosmos
be preserved on earth.

Grant us today that which sustains life:
Clean air, pure water, suitable habitats
health for all of creation.

Forgive us as we finally begin to understand
the consequences of our carelessness.
Guide us as we try to atone
for the loss of precious resources.
Strengthen our respect for all of life
for we are called to be stewards

To honor this world
the amazing display
of your creative power.
May we treasure this beauty, this unity
throughout eternity.
